

I am writing to ask that you not invalidate or supercede Indiana's Telephone Privacy Law. Since I added my name to the list last January I have received only one call, and once I informed them I was on the list they hung up. Before being on the list I would receive one or two calls nightly. It was a high source of irritation for me as I have to get up very early for work and they would frequently wake me up. So please do not do anything that would weaken our Indiana Telephone Privacy Act.

Thank you,

James A. Martin
